

Central Vacuum System

The beginning of HEALTHY HOMES

Green Building Friendly
Good Indoor Air Quality
Silent
Convenient & Easy
Improves Working Environment

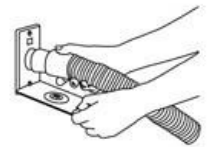

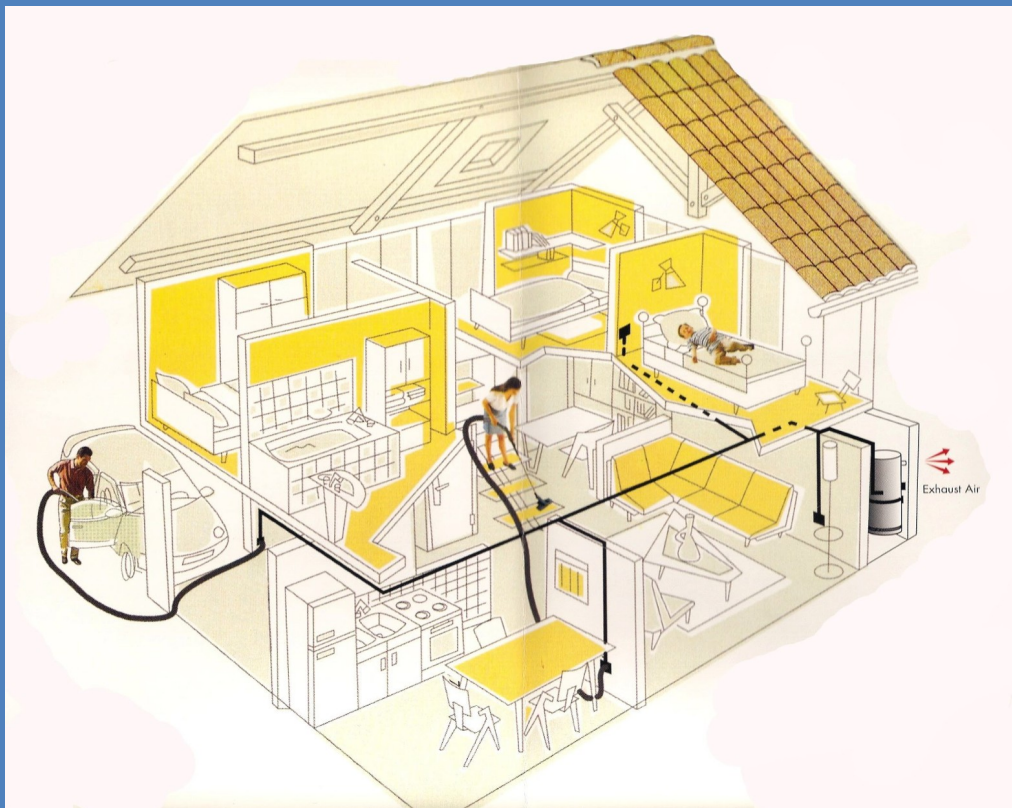

IMPROVE Indoor Air Quality....with *EFFECTIVE POWERFUL* cleaning!

CLEANING is essential for any HOME, both for the commercial value and for the tenants. While there are many cleaning technology available, there is NO system that will effectively get rid of the dust and dirt. **Central Vacuum Systems** have been used in many smart green buildings whereby it ensures 100% no re-circulation of the dust, dirt AND smell back into the house

THE SYSTEM FLOW – a truly intelligent system

Just plug the hose end into any vacuum inlet

Vacuum Plant starts immediately

Dust is conveyed through the pipe network to the Vacuum Unit

Hygienic, quiet and powerful cleaning

External exhaust guarantees **100%** removal of particles not trapped by the filter system

CENTRAL VACUUM SYSTEM ... a MUST for serious home owners!

CONVENIENT

With the carefully designed vacuum inlets located everywhere, the cleaners needs only carry the hose and accessories for use.

SILENT

Even though it is more powerful than standard portable vacuums, cleaning is more silent as the motor sound is confined at the vacuum unit. Thus, cleaning can be done while the baby sleeps or the father working

GREEN BUILDING INDEX

Add a valuable point for innovation and making the building a more sustainable and healthy for occupants.

POWERFUL

Since the vacuum unit can be placed at a stationary position, the vacuum motor is sized to be more powerful and sufficient filter area is provided for consistently strong performance. So, cleaning is actually done at a higher efficiency

HEALTH

The most important reason being HEALTH. All the materials extracted will be taken away from the residents. This is the ONLY cleaning system that will GUARANTEE 100% no re-circulation of dust back into the home.

FUNCTIONAL AND STYLISH

With a wide range of stylish vacuum inlets to choose from, and given the chance for home owner's to show their system to friends, the Central Vacuum System IS both functional and a show-piece

Full Range of Vacuum Units -

For small condos, Bungalows, Commercial Buildings and Industrial Applications
