

VideoTest - Blood Count

Automated Blood Cell Analysis

VideoTest- Blood Count is the latest version of our automated Blood Cell analysis software. It is designed to minimize the workload of haematologists and other blood cell researchers by fully automating the analysis of blood cells in a blood smear sample.

VideoTest- Blood Count main features include:

- Automated diagnostic analysis of blood cells requiring minimal user intervention
- Automated calculation of Leucocyte blood formula and display of Leucocyte gallery
- Automated analysis of Erythrocyte including measurement and classification with estimation of Poikilocytosis and Hypochromia, calculation of Price-Jones Curve, calculation of Sphericity Index and comparison with standard values
- Automated counting of Platelets / Thrombocytes according to Fonio Method
- Atlas of Blood Cells containing images of normal and pathological cells with text descriptions
- Archiving of analysis results in database
- Customizable Report Templates for printing of reports
- Fully automated system requiring minimal user intervention with ProgRes CF Digital Colour Camera and Marzhauser motorised X-Y stage and Z-Focus drive
- Easy to learn and use system, even for laboratory technologists and assistants, thereby increasing reliability of results
