

VideoTest-Size 5.0

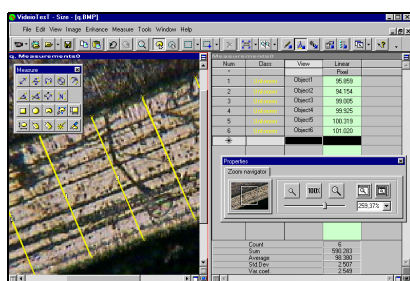

Image Analysis

VideoTest-Size 5.0 software is designed for image acquisition, annotation, enhancement, and measurements with statistical processing of the measure data. The linear and angle features can be measured manually. The image areas (objects) are measured automatically provided that they are manually outlined (with a mouse).

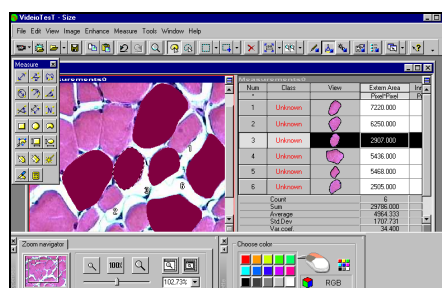

VideoTest-Size 5.0 main functions:

- B/w or color Image acquisition with CCD / digital cameras, scanner, open from files, paste from the clipboard;
- Image enhancement with filters;
- Image annotation (text, graphics), move, copy, rotate the outlined image area, zoom in and out;
- Ability to display the images in different false color palettes;
- Automatic stitching the images;
- Ability to obtain a resultant sharp image from the series of images acquired with various focus depth;
- Manual measurements (linear, angle, radiuses, distance between two parallel lines, etc.), count objects. All measure data are displayed in the spreadsheets;
- Ability to manually outline the image areas (object)
- Ability to automatically outline the image areas with a magic wand
- Automatic measurement of the areas (objects) manually outlined;
- Statistical treatment of the measurement results, data export to MS Excel;
- Ability to create the multi-page reports;
- Save and print images and data;
- Ability to add new functions created with an in-built programming language;
- Ability to install VideoTest-Size 5.0 together with VideoTest-Album 4.0 image database.

VideoTest-Size 5.0 – new software with user-friendly interface, flexibility, and high speed of image processing. The software provides 8 and 10 bit image acquisition.

Measure linear parameters
